

Presentation Topics and Slide Keywords

Smart Commerce - Formal Project Presentation

Slide 1: Smart Commerce

- E-Commerce
- Inventory Intelligence
- Analytics
- Demand Forecasting

Slide 2: Real-Life Problem

- Manual stock tracking
- Scattered business data
- Delayed restocking
- Weak demand visibility

Slide 3: Project Overview

- Full-stack commerce system
- Admin, vendor, customer
- Orders, inventory, analytics
- Forecast-based decisions

Slide 4: Key Features

- Secure login
- Role-based dashboards
- Product and order management
- Low-stock alerts
- Forecast reports

Slide 5: Architecture and Lifecycle

- Client-server architecture
- REST API
- MongoDB persistence
- DSR + Agile increments

Slide 6: Technology Used

- Next.js, React, TypeScript
- Node.js, Express.js
- MongoDB, Mongoose
- JWT, Docker, Python

Slide 7: Business Value

- Better visibility
- Faster decisions
- Reduced stock risk
- Improved customer trust

Slide 8: Future Scope

- Payment gateway
- Recommendation engine
- Advanced ML forecasting
- Intelligent chatbot
- Cloud deployment

Slide 9: Conclusion

- Integrated platform
- Operational intelligence
- Graduate-level engineering
- Scalable future roadmap
